# The Masterclass: Immediacy & Digital Synergy

## Advanced Anterior & Posterior Implant Protocols

### Course Philosophy

The “Immediacy Course by the Blasi Brothers” is built to integrate **biology** and **digital precision**. Successful implantology is no longer just about osseointegration, but about the seamless calibration of a team. By mastering the digital workflow—from smile design to guided surgery—and combining it with advanced soft tissue management, prosthetic design and material selection, clinicians can achieve predictable, aesthetic, and functional excellence. The Blasis’ Masterclass focus is “Team Driven Implantology”: planning with the final smile in mind to ensure long-term stability and patient satisfaction.

## Day 1: The Aesthetic Challenge – Anterior Implants

Digital planning, Immediate placement, advanced soft tissue aesthetics and restoration.

09:00 – 10:30	Digital Interdisciplinary Diagnosis: DSD & Implantology integration. Roles of the specialists, supracrestal tissue analysis, and peri-implant phenotype.
10:30 – 10:50	Coffee Break
10:50 – 12:00	Immediate Implants Part 1 & 2: Critical/subcritical contours, material selection, and the “Pre-Extraction Treatment Table.”
12:00 – 13:00	Hands-On: Digital Workflow: Step-by-step planning for anterior implant. Guided surgery design and understanding fully guided kits.
13:00 – 14:00	Lunch
14:00 – 15:30	Hands-On: The Surgery: Atraumatic extraction, fully guided implant placement, and soft tissue harvesting (Tuberosity/Connective Tissue).
15:30 – 15:50	Coffee Break
15:50 – 17:30	Hands-On: The Provisional (Tooth 11): Technique #1 (Egg Shell 2-Stops) vs. Technique #2 (Stackable two-piece). Suturing techniques: “Belt” & “Suspensory” techniques.
17:30 – 18:00	Case Review: Surgical videos of anterior immediacy and Q&A.

## Day 2: The Functional Foundation – Posterior Implants

Socket management, sinus considerations, and digital workflows.

09:00 – 10:30	The Posterior Strategy: dimensional changes after extraction, decision-making for fresh sockets, and internal vs. external sinus lift criteria.
10:30 – 10:50	Coffee Break
10:50 – 12:00	Soft Tissue Management: surgical vs. prosthetic approaches. Understanding FGJ vs. CTG in second-stage surgeries.
12:00 – 13:00	Hands-On: Posterior Execution: flapless placement, bone grafting, and internal sinus lift via guided approach.
13:00 – 14:00	Lunch
14:00 – 15:30	Hands-On: Emergence Profile: analog vs. digital duplication of emergence profiles. Custom healing abutment fabrication for posterior teeth.
15:30 – 15:50	Coffee Break
15:50 – 18:00	Case discussion and treatment planning. Video demonstration. Maintenance & Communication: Lab technician synergy, long-term maintenance, and certification ceremony.

## Dr. Alvaro Blasi, DDS CDT

Dr. Álvaro Blasi, DDS, CDT, is a Diplomate of the American Board of Prosthodontics. He completed a three-year postgraduate Certificate in Prosthodontics at Augusta University's Dental College of Georgia, followed by a one-year Esthetic and Implant Fellowship at the prestigious Goldstein Center, also at Augusta University. In addition, he is a Certified Dental Technician through the American Board Certification of Dental Technology. Dr. Blasi earned his DDS degree from the Universitat Internacional de Catalunya in Barcelona. He currently serves as an Adjunct Assistant Professor in the Department of Oral Rehabilitation at Augusta University, where he contributes to the academic development of future clinicians.

He has authored multiple publications in international journals, focusing on interdisciplinary treatments, esthetics, and implant dentistry. He lectures nationally and internationally on prosthodontics, sharing his expertise with colleagues around the world. His primary clinical interests include perio-ortho-pros treatments, esthetics, occlusion, and implant restorations.

## Dr. Gonzalo Blasi, DDS MS

Dr. Blasi, DDS, is a Diplomate of the American Board of Periodontology with advanced training from the University of Maryland, Baltimore, where he completed his Certificate in Periodontics, a Master of Science in Oral and Craniofacial Biology, and a Postgraduate Fellowship in Implant Periodontal Prosthodontics. A graduate of the Universitat Internacional de Catalunya (UIC) in Barcelona, he now serves on the periodontics faculty at UIC and as visiting faculty at the University of Maryland.

He is a recipient of the American Academy of Periodontology Foundation's Richard J. Lazzara Fellowship Award and lectures nationally and internationally on periodontics. His clinical interests include peri-implantitis, root coverage procedures, and surgically facilitated orthodontics.
